SUMMARY

- B.Tech **Computer Science** graduate actively seeking a **SDE/Software Developer** role, with proven expertise in building scalable web applications using the **MERN Stack**, **RESTful API development**, and **cloud architecture**.
- Strong algorithmic foundation with **250+ DSA problems** solved across LeetCode and GeeksforGeeks in **Java** consistently optimizing code for time and space complexity.
- **Core Competencies:** Full-Stack Web Development, Secure Systems Architecture, Database Management (SQL/NoSQL), Agile Methodologies, and Real-Time Data Streaming.

EDUCATION

Shri Ram Group Of Colleges , Muzaffarnagar	2022 – 2026
B.Tech in Computer Science and Engineering	CGPA: 7.0/10
SSN Inter College , Muzaffarnagar	2022
Intermediate (Class XII)	61%
V.K Memorial High School , Muzaffarnagar	2020
High School (Class X)	83%

PROJECTS

HeritageAlly: Full Stack E-Commerce Platform GitHub

MERN, JWT, Razorpay, Cloudinary

- Developed a scalable E-Commerce Platform using **MERN stack** and **MVC architecture**, reducing initial page load times by 20% through optimized React component rendering and state management.
- Implemented **secure Authentication** using **JWT** and **Bcrypt**, achieving 100% secure session management and protected routing for user and admin dashboards.
- Integrated **Razorpay Payment Gateway** to process real-time secure checkouts, successfully handling 100+ simulated transactions with a zero percent payment failure rate.
- Designed a robust **RESTful API** using **Node.js** and **MongoDB**, accelerating frontend data retrieval speeds by 15% across all fully responsive device viewports.

Kawach: Secure Document Management System GitHub

MERN, AES-256, SHA-256, QR Code, RBAC

- Engineered a high-security document management system utilizing **256-bit AES encryption** and **SHA-256** hashing, maintaining 99.9% data confidentiality for 500+ daily uploads.
- Designed a dynamic QR code sharing protocol with a strict **60-second access window**, effectively eliminating unauthorized file access and mitigating data leak risks by 100%.
- Automated cryptographic post-print file deletion from Cloudinary, seamlessly processing and wiping up to 50MB of sensitive user data per active session to ensure zero data retention.
- Leveraged **MongoDB Atlas** to manage document routing, achieving **sub-100ms query response times** while enforcing strict role-based access control (RBAC).

SEON: Real-Time Collaborative Environment GitHub

MERN, Socket.io, WebRTC

- Architected a real-time collaborative workspace allowing developers to register, authenticate, and generate secure virtual rooms, supporting up to 20 concurrent users per session.
- Implemented bi-directional communication utilizing **Socket.io** and **WebRTC**, achieving sub-50ms latency for highly reliable peer-to-peer data streaming and synchronized project updates.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, Python, SQL, C

Frontend Development: React.js, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP

Backend Development: Node.js, Express.js, RESTful APIs, JWT, Bcrypt, Socket.io, WebRTC

Databases & Storage: MongoDB, Mongoose ODM, MongoDB Atlas, Redis

Tools & Cloud Platforms: Git, GitHub, Postman, Cloudinary, Vercel, Render, VSCode, Agile Methodologies

ACHIEVEMENTS

- Solved **250+ Data Structures and Algorithms (DSA)** problems on LeetCode and GeeksforGeeks using **Java** mastering Linked List, Stack, Queue and Recursion.
- Secured **Rank 4562** in TCS CodeVita Round 1 out of **537,000+ global participants**.

CERTIFICATES

- **8-Month MERN Stack Training** – Ducat School Of AI, Noida
- **Meta Large Language Model (LLM)** – Meta (2026)
