SUMMARY

- Computer Science graduate with **6 months of hands-on internship experience** in Full Stack Development at **S O Infotech (P) Ltd., Noida**, working on production-level Billing Software using the **MERN Stack** and **RESTful APIs**.
- Solved **400+ Data Structures & Algorithms problems in Java**, strengthening analytical thinking and algorithmic efficiency. Seeking an SDE/Full Stack Developer role to build scalable and impactful software solutions.

EDUCATION

Aug 2022 – May 2026 B.Tech in Computer Science and Technology, Shri Ram Group Of Colleges CGPA: 6.89/10

EXPERIENCE

Full-Stack Development Intern

S O Infotech (P) Ltd., Noida Mar 2025 – Sep 2025

- Developed a full-stack **Billing Software** system using the **MERN stack**, building end-to-end invoicing and billing management workflows for **50+ daily transactions** under the guidance of the Technical Head.
- Built responsive frontend interfaces with **React.js** for invoice generation, billing record management, and real-time transaction tracking, reducing manual invoice processing time by **30%**.
- Designed and built **RESTful APIs** using **Node.js** and **Express.js** with **MongoDB** for data persistence, collaborating on feature integration, debugging, and code reviews across a **6-month** development cycle.

PROJECTS

HeritageAlly: Full Stack E-Commerce Platform

MERN, JWT, Razorpay, Nodemailer  Mar 2026

- Developed a scalable E-Commerce Platform using **MERN stack** and **MVC architecture**, reducing initial page load times by **20%** through optimized React component rendering and state management.
- Configured** secure Authentication using **JWT** and **Bcrypt**, achieving **100% secure session management** and protected routing for user and admin dashboards.
- Integrated **Razorpay Payment Gateway** to process real-time secure checkouts, successfully handling **100+ simulated transactions** with a zero percent payment failure rate.
- Designed a robust **RESTful API** using **Node.js** and **MongoDB**, accelerating frontend data retrieval speeds by **15%** across all fully responsive device viewports.

SEON: Real-Time Collaborative IDE with AI

MERN, Socket.IO, Redis, Gemini API  Dec 2025

- Engineered** a high-performance browser IDE enabling seamless multi-user collaboration for **15+ concurrent session users** using synchronized OT mechanisms.
- Integrated **Google Gemini API** to deliver real-time AI code generation, automated refactoring, and context-aware bug fixes with zero runtime overhead.
- Optimized real-time data sync using WebSocket channels in **Socket.IO** backed by **Redis pub/sub**, cutting operational state synchronization lag below **50ms**.
- Hardened session security by implementing custom **JWT authentication** with multi-factor token verification and role validation.

SKILLS

Programming Languages:	Java, C++, JavaScript, TypeScript, Python, SQL
Backend Development:	Node.js, Express.js, Java, REST APIs, Socket.IO, JWT
Frontend Development:	React.js, Next.js, Redux Toolkit, Tailwind CSS
Databases & Caching:	MySQL, PostgreSQL, MongoDB, Redis, Pinecone
Cloud & DevOps:	Docker, AWS (EC2, ECS, ECR, SQS), GitHub Actions, Git, GitHub
AI & Generative AI:	RAG, LangChain, Pinecone, OpenAI API, Gemini API
Core Computer Science:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, System Design
Developer Tools:	VS Code, Postman, Vercel, Cloudinary

ACHIEVEMENTS

- Solved **400+ Data Structures and Algorithms (DSA) problems** on **LeetCode** and **GeeksforGeeks** using **Java** mastering Linked List, Stack, Queue and Recursion.
- Secured **Rank 4562** in TCS CodeVita Round 1 out of **537,000+ global participants**.

CERTIFICATES

- 8-Month MERN Stack Training** – Ducat School Of AI, Noida
- Meta Large Language Model (LLM)** – Meta (2026)
